Office Action Summary	Application No. 09/995,779	Applicant(s) ISOHATA ET AL.	
	Examiner Kevin Quarterman	Art Unit 2879	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 January 2006.
 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-13,15-23,25 and 27 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 1,3-13,15-23,25 and 27 is/are rejected.
 7) ☐ Claim(s) _____ is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☒ The drawing(s) filed on 14 April 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☒ All b) ☐ Some * c) ☐ None of:
 1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
 * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 20 January 2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3-13, 15-23, 25, and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Isohata (US 6,288,489).

4. The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

5. Regarding independent claim 1, Figure 4 of Isohata shows a plasma display apparatus comprising a plasma display panel (10), circuit substrates (11, 12) having drive circuits (13) to drive the plasma display panel, a main frame (17) to mount the circuit substrates, and adhesive tapes (Figs. 5A-C, Element 1a-c) to fix the plasma display panel to the main frame, wherein the main frame comprises plural small holes (7) arranged regularly at established intervals and entirely on the portion where the adhesive tapes contact the main frame and are fixed.

6. Regarding claim 3, Figure 7A of Isohata shows the main frame comprising plural small recesses on the portion, to which the adhesive tapes are fixed, of the surface to which the adhesive tapes are fixed.

7. Regarding claim 4, Figure 6A of Isohata shows the plural small recesses arranged regularly at established intervals.

8. Regarding claim 5, Figure 6A of Isohata shows the main frame comprising plural small recesses provided on the surface opposite to the one to which the adhesive tapes are fixed.

9. Regarding claim 6, Figure 6A of Isohata shows the plural small recesses, provided on the surface opposite to one to which the adhesive tapes are fixed, arranged regularly at established intervals.

10. Regarding claim 7, Figure 6A of Isohata also shows the main frame comprising plural small projections on the surface opposite to one to which the adhesive tapes are fixed.

11. Regarding claim 8, Figure 6A of Isohata shows the plural small projections arranged regularly at established intervals.

12. Regarding claim 9, Figure 5B-C of Isohata shows the adhesive tapes comprising plural small holes (area between adjacent adhesive strips).

13. Regarding claim 10, Figure 6A of Isohata shows the plural small holes of the adhesive tapes arranged at established intervals.

14. Regarding claim 11, Figure 5 of Isohata also shows the adhesive tapes comprising plural small recesses on the surface in contact with the plasma display panel.

15. Regarding claim 12, Figure 5 of Isohata shows the plural small recesses on the adhesive tapes arranged regularly at established intervals.

16. Regarding independent claim 13, which is basically a combination of independent claim 1 and claim 3, Isohata discloses like limitations of independent claim 1 and claim 3, as discussed earlier.

17. Regarding claim 15, Figure 6A of Isohata shows the main frame comprising plural small recesses provided on the surface opposite to the one to which the adhesive tapes are fixed.

18. Regarding claim 16, Figure 6A of Isohata shows the plural small recesses, provided on the surface opposite to one to which the adhesive tapes are fixed, arranged regularly at established intervals.
19. Regarding claim 17, Figure 6A of Isohata shows the main frame comprising plural small projections on the surface opposite to one to which the adhesive tapes are fixed.
20. Regarding claim 18, Figure 6A of Isohata shows the plural small projections arranged regularly at established intervals.
21. Regarding claim 19, Figure 6A of Isohata shows the adhesive tapes comprising plural small holes (6).
22. Regarding claim 20, Figure 6A of Isohata shows the plural small holes arranged at established intervals.
23. Regarding claim 21, Figure 5 of Isohata also shows the adhesive tapes comprising plural small recesses on the surface in contact with the plasma display panel.
24. Regarding claim 22, Figure 5 of Isohata shows the plural small recesses on the adhesive tapes arranged regularly at established intervals.
25. Regarding independent claim 23, which is basically a combination of independent claim 1 and claim 9, Isohata discloses like limitations of independent claim 1 and claim 9, as discussed earlier.

26. Regarding independent claim 25, which is basically a combination of independent claim 1 and claim 11, Isohata discloses like limitations of independent claim 1 and claim 11, as discussed earlier.

27. Regarding independent claim 27, Figure 4 of Isohata shows a plasma display apparatus comprising a plasma display panel (10), a main frame having plural small holes (7); circuit substrates (11, 12) having drive circuits (13) and mounted on the main frame; and adhesive tapes (Figs. 5A-C, Element 1a-c) placed over the plural small holes, contacting and affixing the main frame to the plasma display panel, wherein the plural small holes are arranged regularly at established intervals and entirely on a portion where the adhesive tapes contact the main frame and are fixed.

Response to Arguments

28. Applicant's arguments received 20 January 2006 have been fully considered but they are not persuasive.

29. In response to applicant's argument that Isohata does not teach the adhesive tapes contacting the main frame, the Examiner notes that Figures 4, 5A-C, 6A of Isohata show the adhesive tapes (1) *indirectly* contacting the main frame (17) by way of plate (18). Applicant notes that the term *contact* is defined as a "union or junction of surfaces" or "connection." Using this definition, the Examiner submits that adhesive tape is in *connection*—i.e., in contact—with the main frame via the plate. The Examiner also notes that Figure 3 of Isohata shows the adhesive tapes (1) *directly* contacting the main frame (17a).

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quarterman whose telephone number is (571) 272-2461. The examiner can normally be reached on M-TH (7-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on (571) 272-2457. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
